### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward Tracy on June 5, 2007.

2. Applicant authorizes the deletion of the figure from the abstract. The text of the abstract remains the same:

The present invention describes a communication system on an IP network (50) between an automation equipment (10) and one or more remote devices (30). The communication system is based on the Simple Object Access Protocol (SOAP) for the purpose of providing the remote device (30) with automation equipment (10) supervision, display, control, configuration or programming functions. The automation equipment (10) comprises at least one WEB service (21) and/or one WEB client (22) able to interact with a program (20) of the automation equipment (10), capable of decoding messages received (51, 54) from the IP network (50) encoded according to the SOAP protocol and capable of encoding messages to be sent (52, 53) according to the SOAP protocol. A service description document (61), accessible to a remote device (30, 30") describes the capacities of one or more WEB services (21) implanted in an automation equipment (10). This document may be stored or constructed dynamically by a generator (62).

*Allowable Subject Matter*

3. Claims 1-20 are allowed. This allowance is only in response to the Board of Patents and Interferences reversal of the Examiner's rejection of claims 1-20 that relied upon Linderman, U.S Patent Publication No. 20030032790. The BPAI found that Linderman was undeserving of the priority date of its provisional application and therefore did not qualify as prior art.

Pursuant to MPEP §1214.04, full faith and credit is given to the prior examiner's search and no new search has been made to "uncover other or better references." However, for completeness of the application history, the current examiner would like to introduce into the record two references that are directly related to Applicant's claims that were not cited by the previous examiner: Mein et al, U.S Patent No. 6,457,066 and Gandhi et al, U.S Patent No. 7,085,814.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Mein et al, U.S Patent No. 6,457,066;

Gandhi et al, U.S Patent No. 7,085,814.
